Disasters:**Declaration Number**

NSP

Narratives**Areas of Greatest Need:**

The foreclosure and abandonment risk score, developed and provided to grantees by HUD, was created to indicate the level of risk that an area will have foreclosures and abandonment. It was determined that those census tracts in the City of South Bend with the greatest risk score (a score of ten), based on the HUD provided data, were in greater need than those areas with a lower risk score. However, South Bend has a total of 25 census tracts with a risk score of ten (2, 3, 01, 4, 5, 6, 9, 10, 14, 15, 17, 19, 20, 21, 22, 23, 24, 25, 27, 28, 29, 30, 31, 33, 34 and 111). So these 25 census tracts were further evaluated based on the percentage of high cost loans, percentage of residential vacancy, number of foreclosures, the forecasted foreclosures, and percent of subprime loans. HUD also provided data on the percentage of loans made between 2004 and 2006 that are high cost by census tract. High cost loans are considered to be loans with an interest rate three percentage points higher than a benchmark rate (for a first mortgage). Census tracts 30, 5, 21, 27 and 4 were the top five, respectively, for percentage of high cost loans. Each census tract had between 61% and 65% of all loans made in the area defined as high cost. In addition, HUD data included the residential vacancy rate, which was developed based on information from the U.S. Postal Service on addresses that have been vacant for 90 days or longer, as of June 2008. The top five census tracts for percentage of residential vacancy were 6, 21, 30, 19 and 4 respectively. In census tract 6 and 21, over 35% of all residential units were vacant. The City of South Bend utilized Sheriff Sale data, which compiled, for the years 2001 - 2007 in the determination of the areas of greatest need. At Sheriff Sale properties that are going through foreclosure are officially purchased back by the lending institution - one of the final steps of the foreclosure process. Over 500 foreclosures have occurred in census tract 6 during that timeframe - accounting for 7.7% of all of South Bend's foreclosures. The remaining top five census tracts for foreclosures are 4, 2, 34, and 31 respectively. Based on the collected foreclosure data, forecasted foreclosures for 2008 and 2009 were developed (through use of linear regression). These forecasted figures help provide an understanding of where foreclosures will continue to happen based on the trend from 2001 - 2007. It is anticipated that census tract 6 will remain at the top of the list with 118 foreclosures forecasted in 2008. The City of South Bend was provided subprime mortgage data from researchers at the University of Notre Dame who are studying foreclosures in St. Joseph County Indiana. HUD classifies lenders as subprime or not, based on whether it is believed to have subprime lending practices. The lender of each loan made in the city of South Bend between 2001 and 2006 was compared to the list of HUD classified subprime lenders and the percentage of total loans made by subprime lenders was determined. Based on the above listed factors, the tracts were prioritized to determine which areas are in the greatest need. Ranks were added, with equal weight, divided by five to determine the average rank amongst the criteria then assigned an overall rank (the lowest average rank being the greatest area of need). Based on this methodology, the greatest area of need is census tract 6, followed by 4, 30, 21 and 5.

Distribution and and Uses of Funds:

The City of South bend examined census tracts based on available information related to the requirements of Section 2301(c)(2) of HERA that funds be distributed to the areas of greatest need. In determining area of greatest need the City of South Bend examined the areas of greatest need by looking at: *Area with greatest percentage of home foreclosures by utilizing home foreclosures data. *Area with the highest percentage of homes financed by subprime mortgage related loans by utilizing percentage of high cost loans data and percentage of subprime loans data. *and areas identified by the grantee to face a significant rise in the rate of home foreclosure by utilizing forecasted home foreclosure data and vacancy rate data. In addition, the City used other criteria to determine the location of other areas that had a great need to foreclosure assistance. These criteria included proximity to the top five areas of need, portions of census tracts that have a high concentration of foreclosures and ability/capacity to implement projects in an area. Based on the data the areas of greatest need were identified as census tracts 6, 4, 30, 21 and 5. In addition to these areas, the City identified census tract 19 as an area in greatest need based on the data and the foreseen likelihood of foreclosures. Census tract 19 is ranked as the 10th most in need area; however it is believed that its proximity to four of the top five census tracts makes it a critical area to help stabilize. There is a concentration of foreclosures in the northwest corner of the census tract, with is immediately adjacent to census tract 6, 21 and 5. A portion of the funds are required to be spent providing housing to households whose income do not exceed 50 percent of the area median income. These funds totaling \$1,024,630 (which is 25% of our allocation) will be used to develop permanent rental apartments for the special needs population; however the partner agency has yet to

be determined for this project. As such the exact location of the facility (s) will be determined based on the needs of the population being served and the partner agency. The remaining available funds will be spent on a variety of projects in compliance with the Neighborhood Stabilization Program requirements to address abandoned and foreclosed properties within census tracts 6, 4, 30, 21, 5 and 19.

Progress Toward National Objective Targets

National Objective	Target	Actual
NSP Only - LH - 25% Set-Aside	\$1,024,630.25	\$1,024,631.00

Overall Progress Narrative:

Code Enforcement demolished five delapidated properties. SBHF has started on the construction of two rental group homes for special needs population and has six properties for sale. The NNN sold 715 cottage grove to an income eligible person, and continues to market additional properties for sale. Habitat for Humanity sold 425 Madison st. to a low income homebuyer. The City of South Bend will continue to administer NSP 1 subgrantees and activities.
